

## Get the most out of your digital curriculum with **Savvas Course Connection**.

Savvas Realize® is one of the edtech industry's most versatile learning management systems. It includes powerful integrations to make access to your classroom's digital content and tools safe, easy, and effective. **Savvas Course Connection** is the suite of third-party products that integrate and work with Savvas Realize to improve your digital experience.

No matter what technologies you use,  
we have an integration for you.

To learn more about how these integrations can work for you,  
schedule a meeting with your **Rubicon Account Manager**.

**Rostering Tools:** The foundation of any edtech integration is getting students to and from the right place at the right time. Our rostering suite of course connections allows for safe and secure transferring of credentials between Savvas EasyBridge, our auto-rostering and SSO tool, and partners like ClassLink™ through industry standards like 1EdTech™.

**Student Information System (SIS):** Life is easier when your LMS communicates with your school or district SIS. Our integrations with the most popular SIS allow you to safely share student data between systems in real-time and ensure accurate roster and grade information.

**Learning Management Systems (LMS):** Working with Savvas content in your existing LMS has never been easier.

Our industry-leading integration with Google Classroom™ continues to make an impactful difference for educators who use our content with Google tools on a daily basis. Teachers can easily sync Realize to their Google Classroom and start assigning content and assessments in minutes.

**Productivity Tools:** Creativity prospers when you have productive tools to help. Users who store files on Google Drive™ or Microsoft® OneDrive™ can easily assign those files to their classroom and accept them as part of an assignment.

**Deep Linking:** Savvas Realize supports the deep linking of assignments by teachers. This means teachers can assign a Realize assignment in their platform of choice (Seesaw, Microsoft Teams, and anywhere else you can post a link) and when accessed by the students, that link will recognize them and send them to log in and complete the assignment in Realize.

Seamless integration makes it easy to share Realize content with **Google Classroom** and link to **G Suite™** productivity tools.

Look for faster integrations, improved usability, and enhanced data fidelity through **LTI-Advantage (LTI-A)**.

Use this matrix to compare which Realize features integrate with third-party LMS providers.

Default Realize Features	Google Classroom	LTI- Advantage
<b>Course Creation</b>		
Pick and choose the content you want to include in your course	✓	✓
Ability to create a master course and share that course with teachers	✗	✓
Ability to share or copy content links	✗	✓
